

# OneNote keeps track of stuff at Work, Home, or School

**Gather, organize, search, and share** 🧠  
ideas, thoughts, clippings, lists, projects,  
meeting notes, lectures, references,  
event plans, instructions, journal,  
etc. etc. etc.

## How are OneNote pages different?

You can type anywhere on the page.

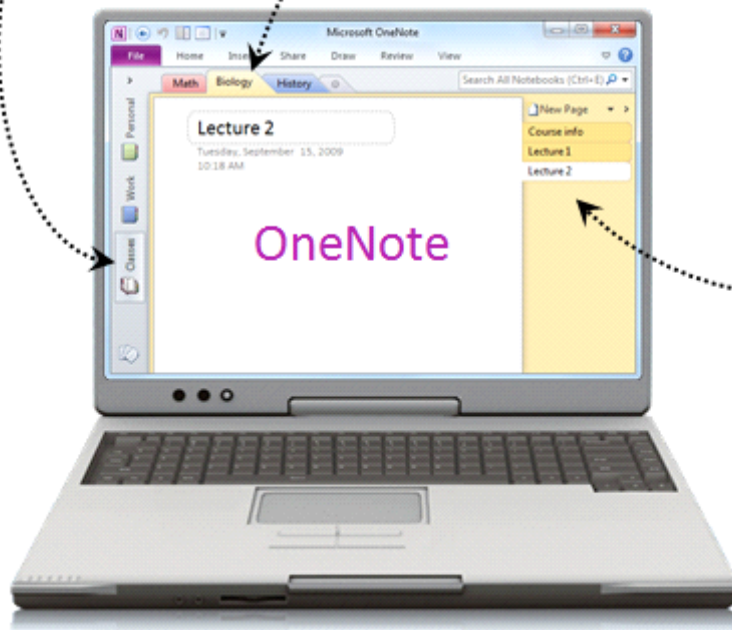

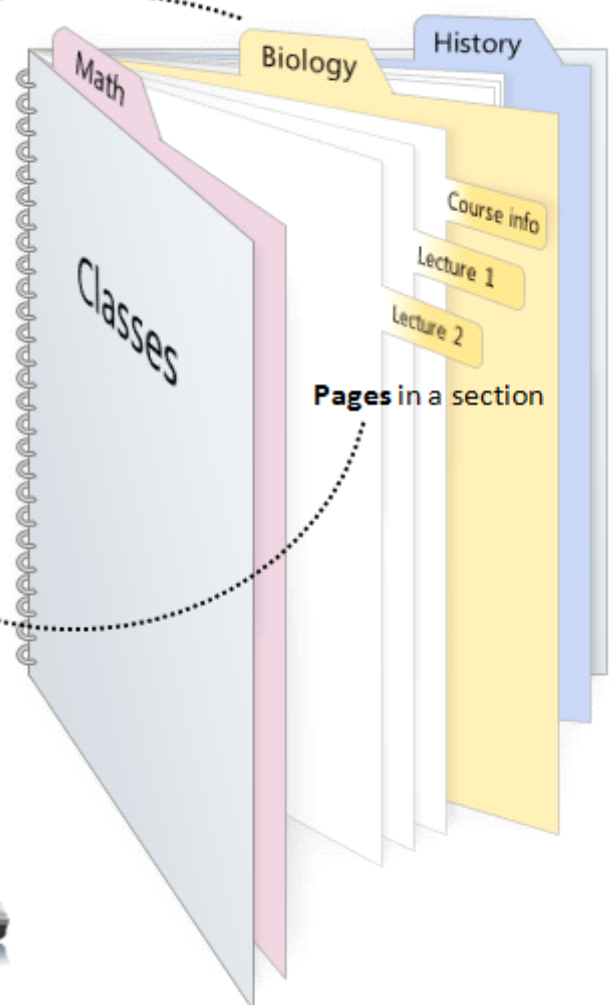

For example, **type your name there:** →

# OneNote Basics

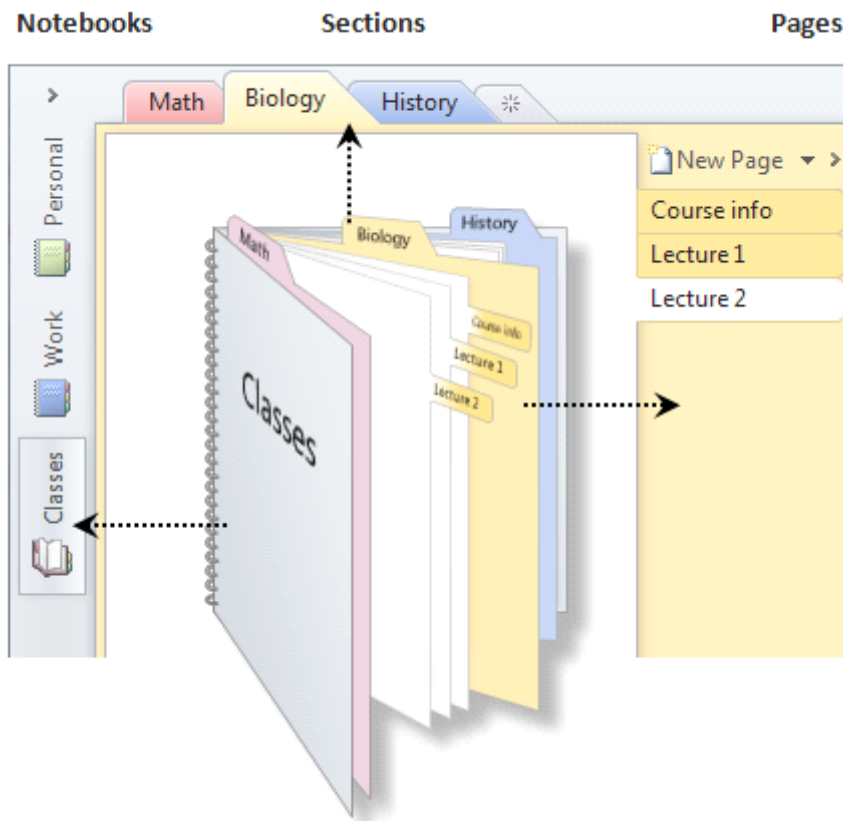

## Take notes of many types

See **Home >** and **Insert >**

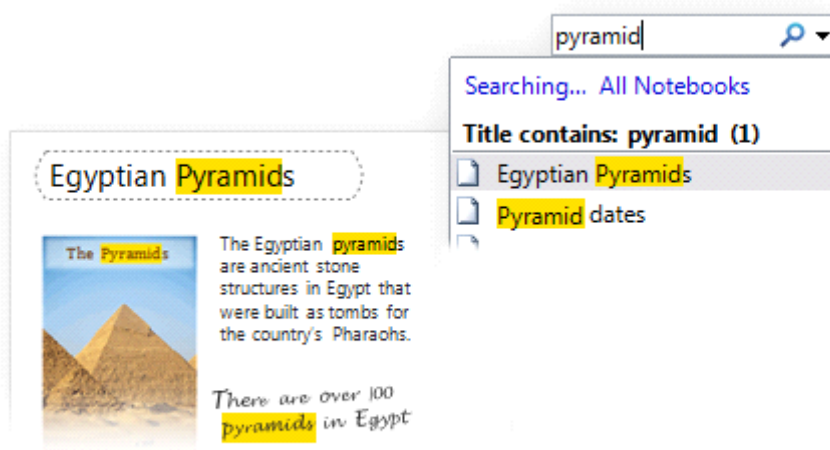

OneNote saves automatically, so you don't lose anything.

## Organize

Create as many notebooks, sections, and pages as you need.

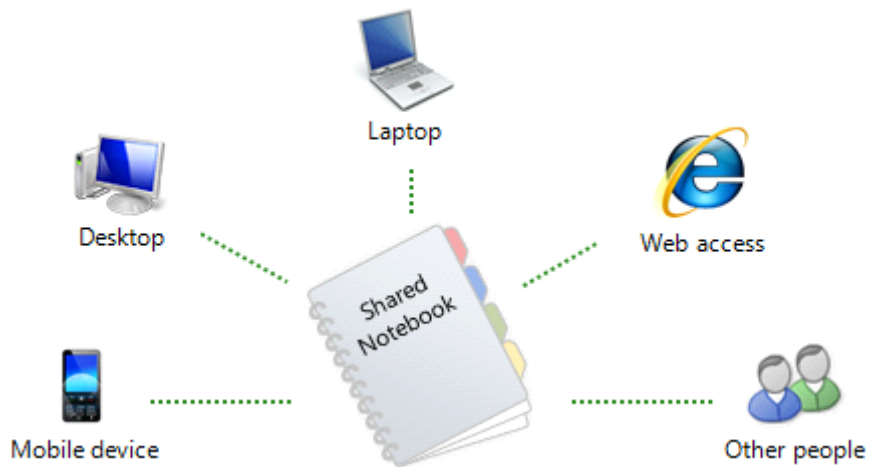

New Notebook:  
**File > New**

## Search

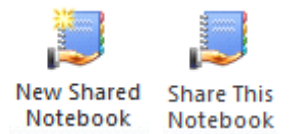

Jump to favorite pages quickly.

Find even handwritten notes or text in pictures!

**Share with yourself or others**

**Share >**

**Access your notes from anywhere!**

 Automatic sync. Edit even while offline.

**Team Notebook example:**

# Top Uses

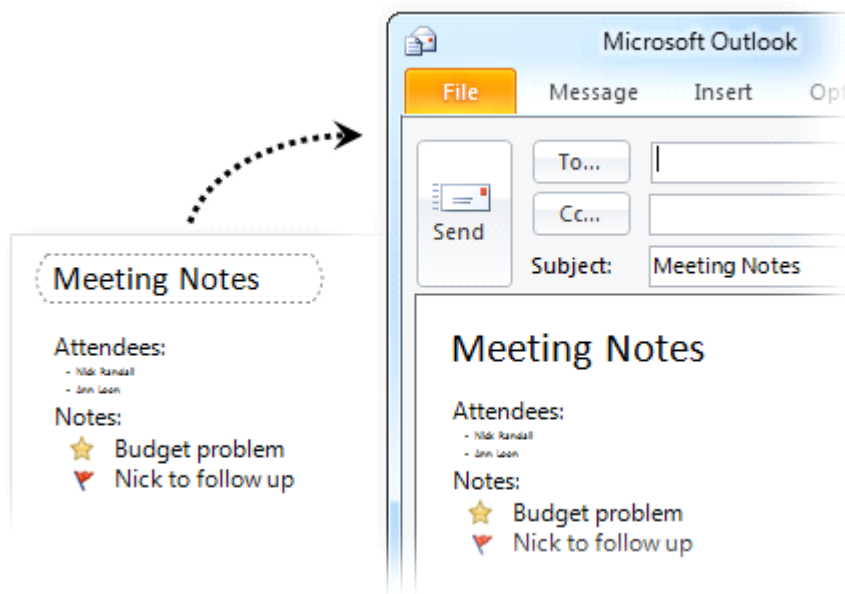

## Collect product screen clippings

Clip maps, diagrams, car photos, weather, wedding dresses, etc.

Insert >

or hold:

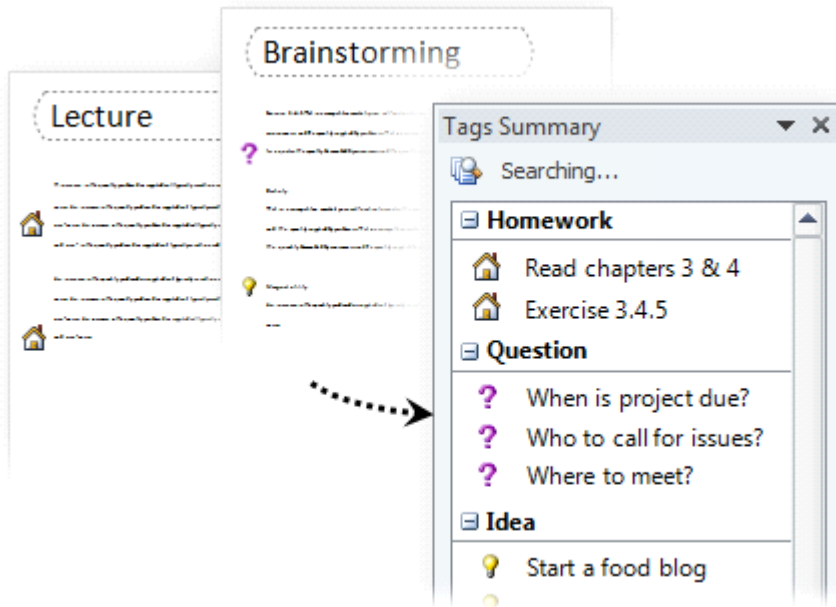

## E-mail out meeting notes,

instructions, status, work items, etc.

Recipients don't need OneNote.

Share >

## Tag and find important items

Homework, ideas, billable items, customer requests, to-dos, etc. You can customize your own tags.

Right-click a note >  Tag

Home >  Find Tags

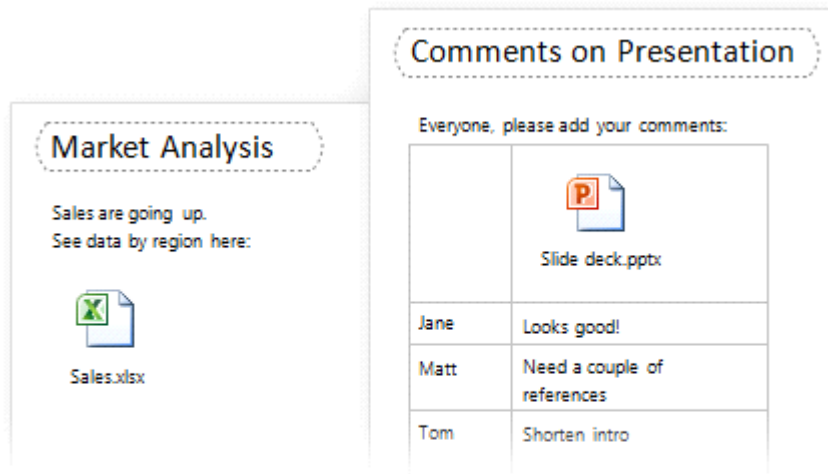

## Collect articles from the Web

News, research, quotes, etc. OneNote preserves the link back.

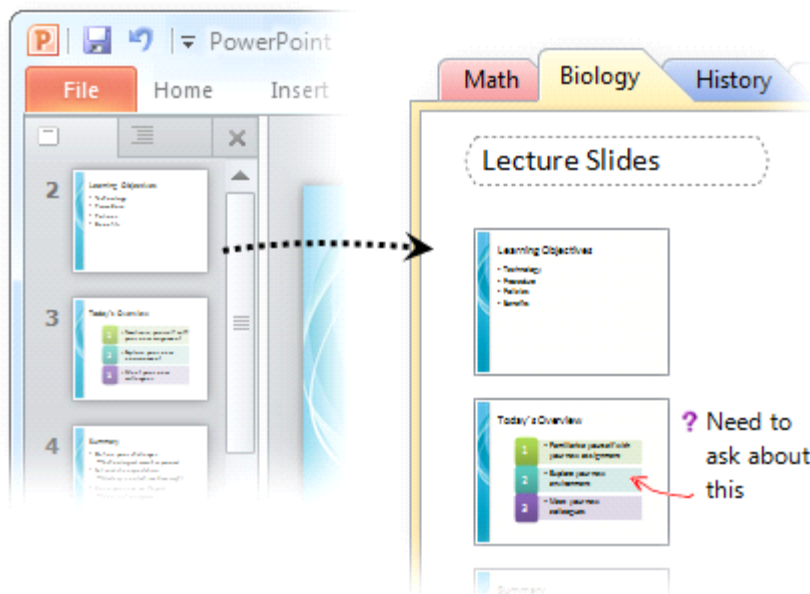

Right-click in IE >  Send to OneNote

**Keep project documents together with your notes**

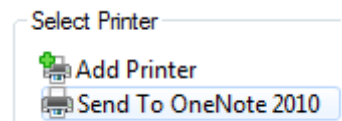

Insert >

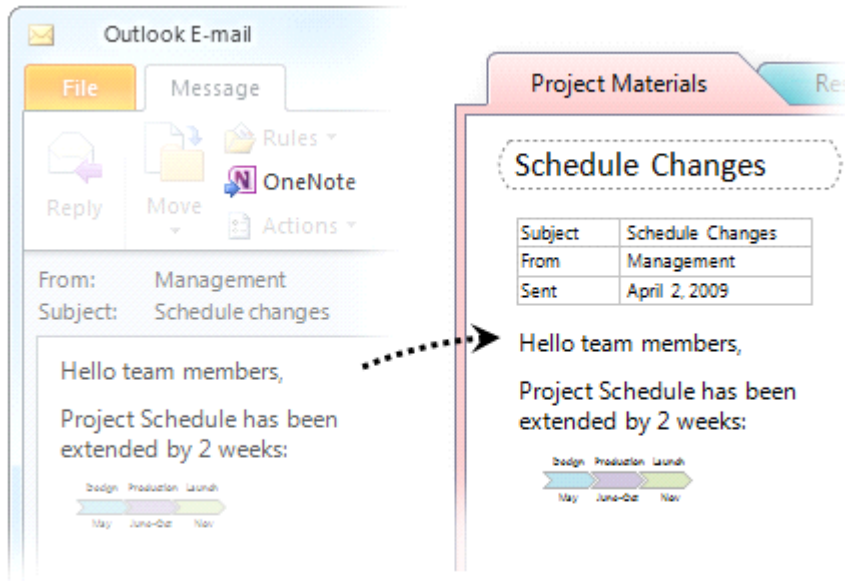

**Annotate lecture slide printouts**

Print presentations, documents, or anything else into OneNote for comments or future reference.

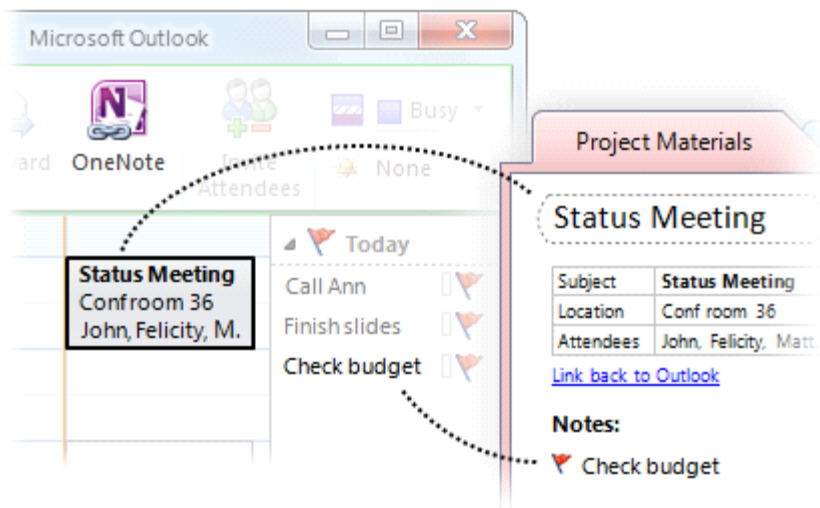

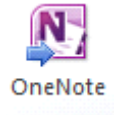

**Print from any app >**

**Keep key project e-mails together with your notes**  
Send e-mails to OneNote.

In Outlook >

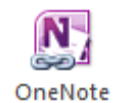

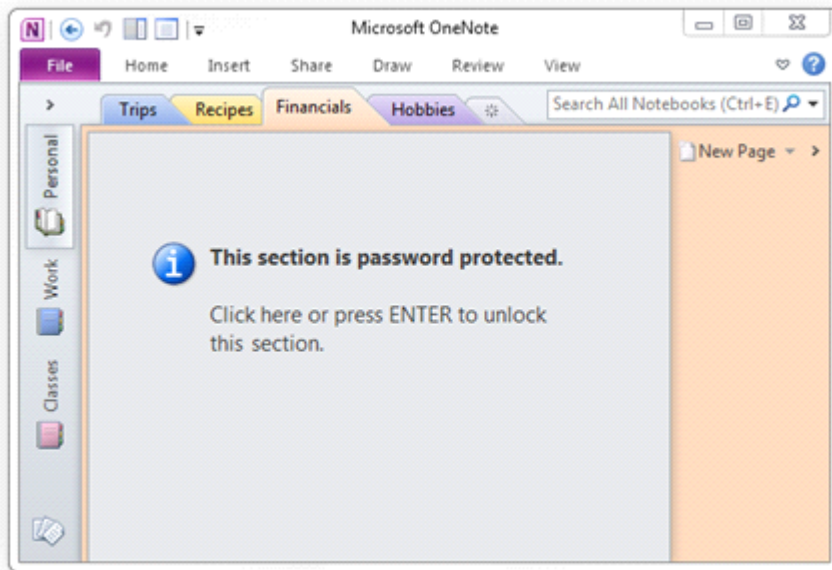

**Link meeting notes and tasks with Outlook**

Home >

In Outlook >

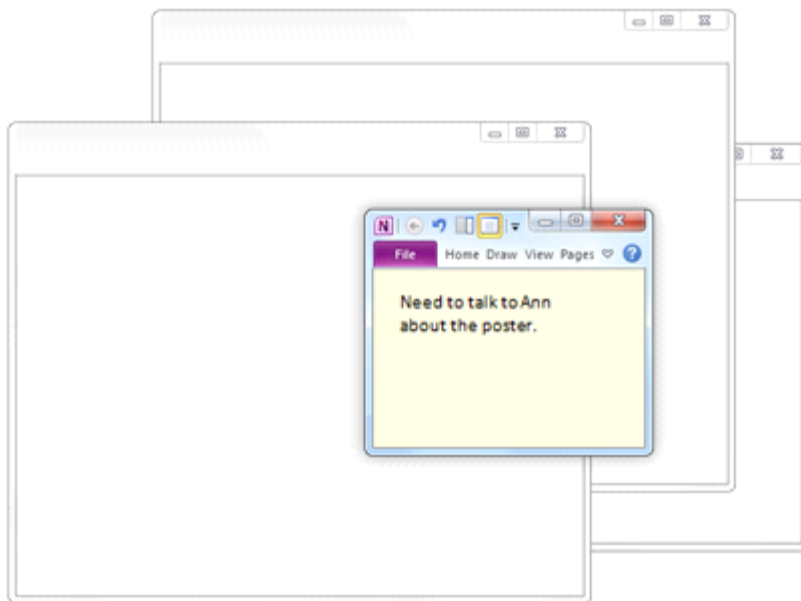

## Protect sensitive information

Bank account information, web site logins, private journal, etc.

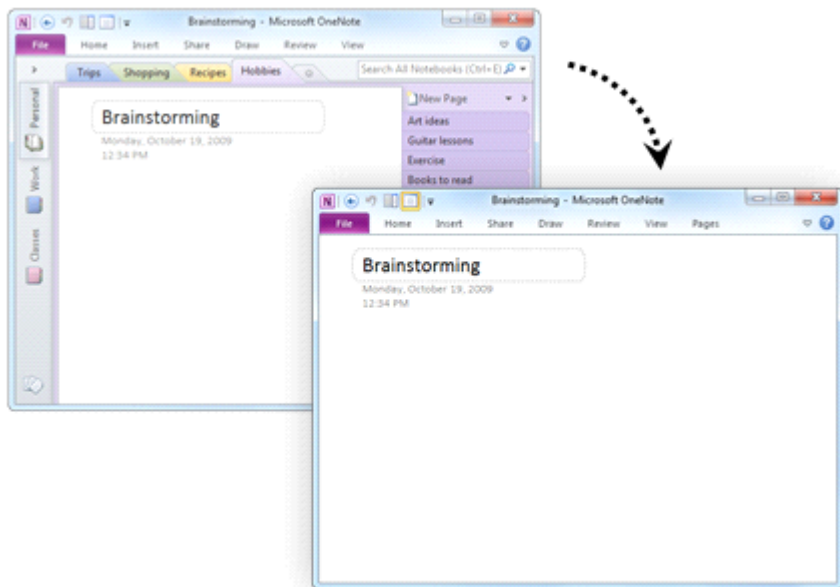

**Right-click**  
**section tab > Password Protect**

## Jot a note quickly

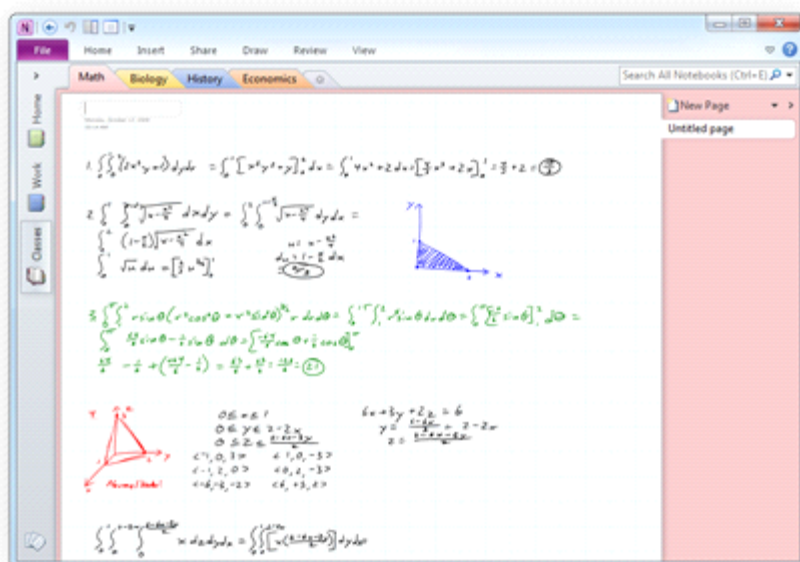

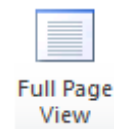

It goes into your Unfiled Notes section.

**Hold:**  + N

## Brainstorm without distraction

View >

## Handwrite class or meeting notes on a Tablet PC

You can even search handwriting, or convert it to text.

## Other Tips

- Create **tables** simply by typing some text and pressing TAB.
- **Calculator**: type Space after "=" in expressions. For example: 321\*45+876=
- Try **Page Templates** in the New Page drop-down menu. Make your own templates for meetings or projects.
- **Record audio** of a meeting, synchronized with your notes, or drag in audios or videos onto your pages.

# What's New?

## New features in 2010:

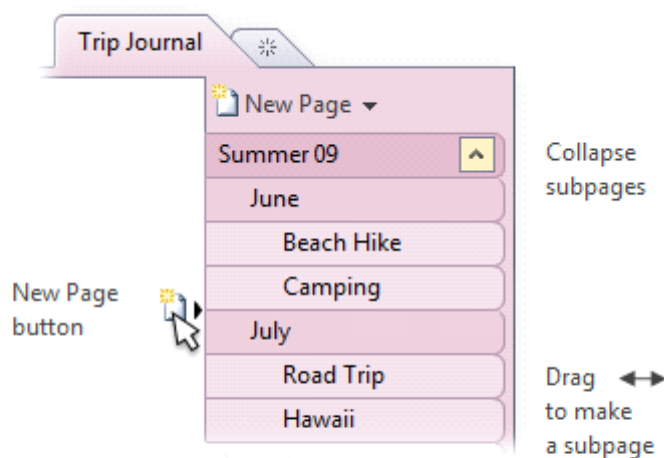

### Gather, organize, and search

- Organize page tabs better:
  - Multi-level subpages
  - Collapse subpages
- Jump to any page with a quick search
- Dock to Desktop
- Link to other notes, like a wiki
- Quick Styles for making headings
- Auto-link notes to Web pages and documents
- Insert Math
- Notes on Outlook Tasks
- Send content to any section in OneNote

### Sharing and universal access

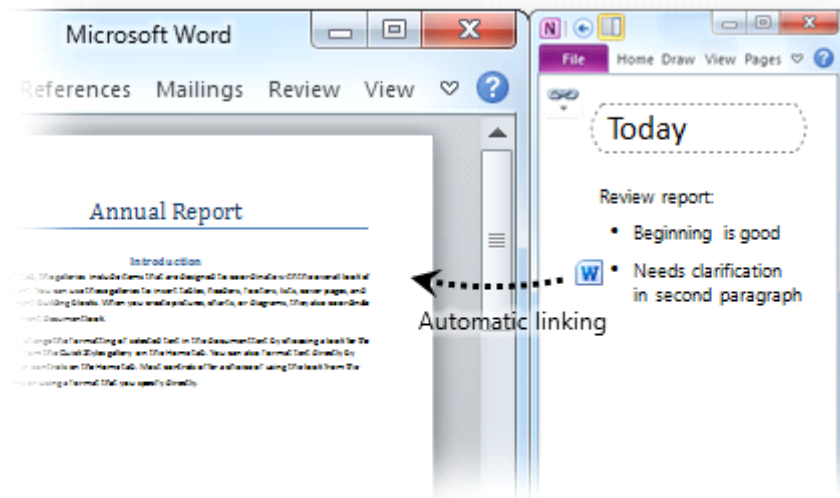

- Access from anywhere:
  - Share on the Web
  - View and edit in a browser
  - Sync notes to OneNote Mobile
- Share notes:
  - Unread changes are highlighted
  - See author initials
  - Version history
  - Find recent edits
  - Find edits by author
  - Faster sync with SharePoint

## Examples:

### Organize topics using subpages

Drag tabs to indent and organize pages within a section.

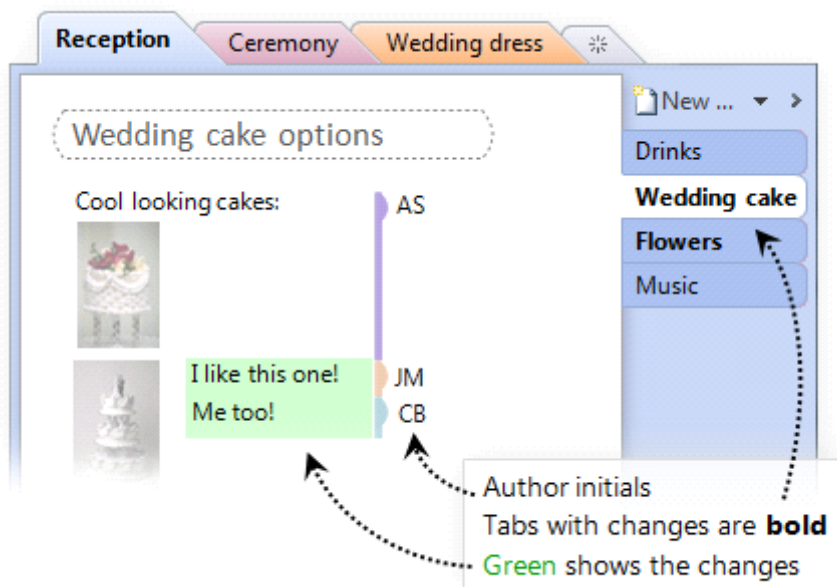

## Keep notes visible during other tasks

OneNote will link notes to documents and Web pages you view.

View >

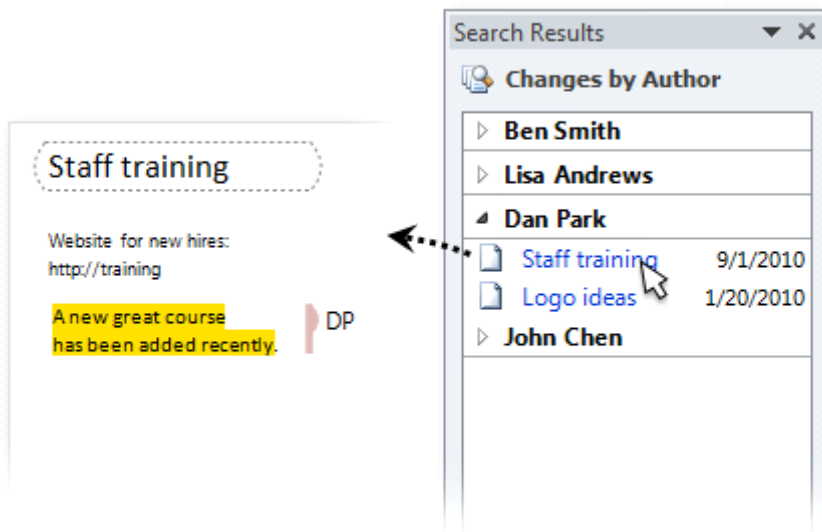

Dock to Desktop

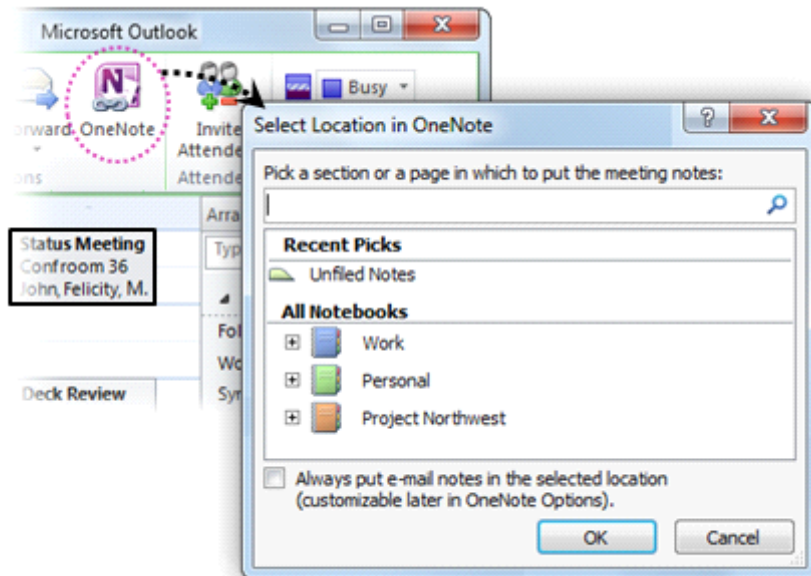

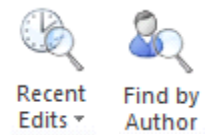

## What's new in a shared notebook?

Unread changes are shown automatically.

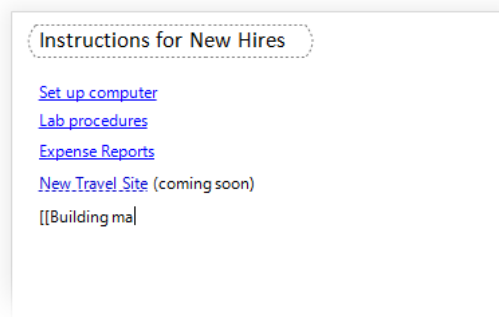

What notes are teammates working on?

Share >

Select location when sending to OneNote

When sending from Outlook or Internet Explorer

Link to information for yourself and others

Insert >

or type [[page name]]

Small correction below....  
It is TS11 not TS05.

Below is the URL which we are using to connect CSP TS11 environment. Please confirm.

Dharmendar,  
Do you want to have only 100 active members like how we did TBA testing before?

Thanks,

Hi Moumita/Iyyapan,

Can you provide 100 WADSNP members in any of your lower environments to test Auto cancel report for BAM feed.

Thanks,  
Dharmendar CH.

Hi Dharma,

We need one CSP environment where we can apply WA TBA for the BAM Testing.  
Could you please check with Someone from CSP for the environment which is having less number of WA members to process TBA.

Thanks & Regards,

Hi Chandra,

I have conflict with other meeting. So, will continue from tomorrow.  
Meanwhile, please let the team get familiar with these things:

FYI: In our EEMS we do more of File Manipulations and I/O operations as part of Shell Programming Scripts. So, I would recommend team to go through the same.  
Go to Tutorial's Site, as given below, and ask them to prepare (on File Manipulations and I/O operations) before we get started on actual EEMSbased scripts  
<https://www.javatpoint.com/shell-scripting-tutorial>

Also, find here below the list of Commands that are frequently used in EEMS:

chmod  
cp  
cd  
AWK, split  
sed  
export  
date  
piping  
Example : PID instance check : `ps -fu \$USER |grep -i "FileValidate.sh" |grep -v "vi" |grep -v "GPS" |grep -v "more" |grep -v "cat" |grep -v "grep" |wc -l`  
mailx  
cp  
rm  
awk  
cat  
">": redirection  
invoking java  
db2  
mv - move  
tr- truncate  
cut  
head  
tail  
wc  
touch  
read  
sed

regular expressions  
If/Else : Test commands  
gzip  
set -A à for Array declaration  
case à Switch case statement  
ssh  
sendmail  
java à to call java components  
sleep  
find  
grep

Warm Regards  
Swamy

## Brian convo

Friday, June 22, 2018  
9:22 PM

Friday, June 22, 2018

hi Chowdary; good evening!

7:33 PM

Benbrook, Brian K

Hi Brian

7:33 PM

Chowdary, N F

Good Morning

7:34 PM

Chowdary, N F

Happy Friday!

7:34 PM

Benbrook, Brian K

thank you, to you too..!!

7:34 PM

Chowdary, N F

what is the current countdown? how many more days?

7:34 PM

Benbrook, Brian K

18 more days

7:34 PM

Chowdary, N F

actual days or working days?

7:35 PM

Benbrook, Brian K

you guys dont have like this right? may be 12 days is the notice period?

actual days, July 10th is the last working day

7:35 PM

Chowdary, N F

I don't think we have anything like that

usually give 2 weeks notice

7:36 PM

Benbrook, Brian K

yeah..

7:36 PM

Chowdary, N F

unless we really get fed up...then just quit

7:36 PM

Benbrook, Brian K

even nirusha left in 12 days

7:36 PM

Chowdary, N F

7:36 PM

Benbrook, Brian K

hope they take you guys out to lunch or something; sorry I can't go

7:37 PM

Benbrook, Brian K

7:37 PM

Chowdary, N F

need to keep you busy in your last few weeks

7:39 PM

Benbrook, Brian K

its ok

what are the tasks for us?

7:39 PM

Chowdary, N F

only because they will ask me to; it was mentioned other day you don't have tasks for FL; so need to get some

well, I do have some tasks for you

7:39 PM

Benbrook, Brian K

ok sure

7:39 PM

Chowdary, N F

do you work with Java?

7:39 PM

Benbrook, Brian K

noo

7:39 PM

Chowdary, N F

me neither

7:39 PM

Benbrook, Brian K

just enough to be dangerous

can read it, can write really simple

7:40 PM

Benbrook, Brian K

yeah..

7:40 PM

Chowdary, N F

we need to add logic to call mongo table for supplemental data and pair it with inbound member

7:40 PM

Benbrook, Brian K

if no one is there, assign it to me

i will get lokesh help,

7:40 PM

Chowdary, N F

was going to give you those, but there is some Java; hopefully just modification to existing module

7:40 PM

Benbrook, Brian K

ok; great! yes, was going to suggest having Lokesh help

this same logic is also needed for NE, which I think he is on that team

7:41 PM

Benbrook, Brian K

yeah

7:41 PM

Chowdary, N F

and he wrote the mongo modules we will be modifying

7:41 PM

Benbrook, Brian K

yes

7:41 PM

Chowdary, N F

is the tasks on rally?

7:42 PM

Chowdary, N F

yes

I can reassign them to you

will bump them up and add some more; so you can give status

7:42 PM

Benbrook, Brian K

so, supplemental data will come separately?

ok sure

7:42 PM

Chowdary, N F

yes; supplemental files come in separately; we are loading those to a mongo table

when we process an inbound member record, we need to read mongo table and get supplemental records and add to message to send to rules

7:43 PM

Benbrook, Brian K

it's very similar to what we have now for 834 member process; think we can reuse a lot of it  
can have KT session - give you overview

7:44 PM

Benbrook, Brian K

sure..

we will have one, on monday

7:44 PM

Chowdary, N F

do send us, if you are ready with sample supplemental file

7:45 PM

Chowdary, N F

sure; yes, we have everything working where we get a supp file, translate to JSON, and load mongo; there is data on mongo table in dev now

have sample files too

7:46 PM

Benbrook, Brian K

FYI - I reassigned tasks to you; you can check them out in Rally

8:05 PM

Benbrook, Brian K

ok brian

thanks

8:05 PM

Chowdary, N F

yw

we will meet Monday - will give you overview

if you want to start looking at anything, you can look at inbound app process members flow

8:06 PM

Benbrook, Brian K

there we call Mongo with Medicaid ID, and get one or more records back for a member; then we group them in JSON inboundMember array

we will be doing exact same thing for supplemental, only data and object will be different; but same functionality

8:07 PM

Benbrook, Brian K

sure brian.. i will look into it

8:08 PM

Chowdary, N F

k - thanks Chowdary

8:09 PM
